

## Manual x5x Rail

The Rails are Named wit L for Left and R for Right side from the Cabinet. The mounting from the Rail inside the Cabinet is Plug and Play. Place the Rail in a Position like the Photo below and press it in the direction from Arrow 1 and then press it in the direction from Arrow 2.

Do so with all 4 Mount Points. You can fix the Rail with the screws outside the Rail.

Pull out the inner Rail til it stops. Then pull the release Bottom (see Picture below) to pull it out complete.

Place the inner Rail at the Case while Position 4 must show to the Front from the Case. Position the Rail in a Case you can at least mount 2 Screws to fix the Rail with the Case.
