

Nitrox GT-200 RGB Gaming-Maus

The ergonomic, powerful Nitrox GT-200 RGB gaming mouse offers you a multitude of individual adjustment options. There are 9 freely assignable macro buttons available on the software on which preferred commands and actions for different games can be set. Using the software or the built-in dpi button, the speed of the mouse's PIXART 3212 sensor can be easily adjusted in six steps between 500-7200 dpi. The special button on the side has two different modes (adjustable via the button below the mouse), with which the mouse's dpi can either be reduced to 500dpi or fine-tuned in-game, allowing more precise aiming at distant objects.

Other features include the side-facing forward and backward buttons and the 10 selectable RGB effects with 16.8 million colors, which can be adjusted either via the software or the integrated RGB button. The 1.80m long, sleeved USB cable with integrated ferrite core, makes independent of batteries and ensures trouble-free game operation. Huano's high quality click switches also offer a long life of well over 5.000.000 clicks.

- ✓ 10 selectable RGB effects with 16.8 million colors
- ✓ dpi number adjustable in six steps (up to 7200dpi)
- ✓ integrated special key for precise aiming in two modes
- ✓ high-quality click switch from Huano (> 5,000,000 clicks)

Specifications

Keys	9
Dots per inch	500/1600/2400/4000/5000/7200dpi
Sensor	PIXART 3212
Polling rate	125/250/500/1000Hz
Operating voltage	5V=
Lighting	RGB, 16.8 mio. colors
Connection	USB 2.0
Lifetime (keys)	>5.000.000x
Cable length	180cm
Plug&Play	•
Operating systems	Windows 98/2000/XP/7/8/10/11 MAC OS, Linux
Dimensions (H/W/D)	40/75/126mm
Package dimensions (H/W/D)	260/165/70mm
Packing units (VE/VPE)	1/20
Weight (net)	143g
Weight (gross)	265g
Warranty	24 Months
Article number	88884098
